

Would you like to reduce the use of antibiotics in your feed?

Would you like to improve feed efficiency in your animals?

Would you lower your herd's carbon footprint, if you could do all of these things for the same price you are paying today?

Beef producers have the opportunity to use a natural product and avoid the use of antibiotics in their cattle. Agolin is the first product in the world to receive the EU's Carbon Trust designation for reducing methane emissions and improving feed efficiency at the low cost of traditionally used antibiotics.

Here is a link for a webinar next Thursday April 16th at 11 AM eastern time, featuring Peter Williams.

Agolin in beef cattle - a natural alternative

Thu, Apr 16, 2020 11:00 AM - 12:00 PM (EDT)
